Adjusted EBITDA
Adjusted EBITDA represents income from continuing operations before non-vehicle related depreciation and amortization, any impairment charge, restructuring expense, early extinguishment of debt costs, non-vehicle related interest, transaction-related costs and income taxes. We believe that Adjusted EBITDA is useful as a supplemental measure in evaluating the aggregate performance of our operating businesses. Adjusted EBITDA is the measure that is used by our management, including our chief operating decision maker, to perform such evaluation. Adjusted EBITDA should not be considered in isolation or as a substitute for net income or other income statement data prepared in accordance with GAAP and our presentation of Adjusted EBITDA may not be comparable to similarly-titled measures used by other companies.

Free Cash Flow
Represents Net Cash Provided by Operating Activities adjusted to reflect the cash inflows and outflows relating to capital expenditures and GPS navigational units, the investing and financing activities of our vehicle programs, asset sales, if any, and to exclude debt extinguishment costs and transaction-related costs. We believe that Free Cash Flow is useful to management and investors in measuring the cash generated that is available to be used to repurchase stock, repay debt obligations, pay dividends and invest in future growth through new business development activities or acquisitions. Free Cash Flow should not be construed as a substitute in measuring operating results or liquidity, and our presentation of Free Cash Flow may not be comparable to similarly-titled measures used by other companies.
